

# Percentage of High School Students Who Rarely or Never Wore a Seat Belt,\* by Sex, Grade, and Race/Ethnicity, 2019

\*When riding in a car driven by someone else  
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.  
This graph contains weighted results.

# Percentage of High School Students Who Rarely or Never Wore a Seat Belt,\* 1997-2019†

\*When riding in a car driven by someone else

†Decreased 1997-2019, decreased 1997-2013, increased 2013-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1999, 2001, 2003, 2005, 2015.

This graph contains weighted results.

# Percentage of High School Students Who Rode with a Driver Who Had Been Drinking Alcohol,\* by Sex, Grade, and Race/Ethnicity, 2019

\*In a car or other vehicle, one or more times during the 30 days before the survey  
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.  
This graph contains weighted results.

# Percentage of High School Students Who Rode with a Driver Who Had Been Drinking Alcohol,\* 1997-2019†

\*In a car or other vehicle, one or more times during the 30 days before the survey

†Decreased 1997-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1999, 2001, 2003, 2005, 2015.

This graph contains weighted results.

## Percentage of High School Students Who Drove a Car or Other Vehicle When They Had Been Drinking Alcohol,\* by Sex, Grade, and Race/Ethnicity, 2019

\*One or more times during the 30 days before the survey, among students who had driven a car or other vehicle during the 30 days before the survey

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Missing bar indicates fewer than 100 students in the subgroup.

This graph contains weighted results.

# Percentage of High School Students Who Drove a Car or Other Vehicle When They Had Been Drinking Alcohol,\* 2013-2019†

\*One or more times during the 30 days before the survey, among students who had driven a car or other vehicle during the 30 days before the survey

†No change 2013-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ).]

Data not available for 2015.

This graph contains weighted results.

## Percentage of High School Students Who Texted or E-Mailed While Driving a Car or Other Vehicle,\* by Sex, Grade,† and Race/Ethnicity,† 2019

\*On at least 1 day during the 30 days before the survey, among students who had driven a car or other vehicle during the 30 days before the survey

†11th > 9th, 11th > 10th, 12th > 9th, 12th > 10th; W > B (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Missing bar indicates fewer than 100 students in the subgroup.

This graph contains weighted results.

# Percentage of High School Students Who Texted or E-Mailed While Driving a Car or Other Vehicle,\* 2013-2019†

\*On at least 1 day during the 30 days before the survey, among students who had driven a car or other vehicle during the 30 days before the survey

†Decreased 2013-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ).]

Data not available for 2015.

This graph contains weighted results.

# Percentage of High School Students Who Carried a Weapon,\* by Sex,† Grade,† and Race/Ethnicity, 2019

\*Such as a gun, knife, or club, on at least 1 day during the 30 days before the survey

†M > F; 9th > 10th (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

## Percentage of High School Students Who Carried a Weapon,\* 1997-2019†

\*Such as a gun, knife, or club, on at least 1 day during the 30 days before the survey

†No change 1997-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1999, 2001, 2003, 2005, 2015.

This graph contains weighted results.

# Percentage of High School Students Who Carried a Weapon on School Property,\* by Sex,† Grade, and Race/Ethnicity, 2019

\*Such as a gun, knife, or club, on at least 1 day during the 30 days before the survey

†M > F (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Carried a Weapon on School Property,\* 1997-2019†

\*Such as a gun, knife, or club, on at least 1 day during the 30 days before the survey

†Decreased 1997-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1999, 2001, 2003, 2005, 2015.

This graph contains weighted results.

# Percentage of High School Students Who Carried a Gun,\* by Sex,† Grade, and Race/Ethnicity, 2019

\*Not counting the days when they carried a gun only for hunting or for a sport such as target shooting, on at least 1 day during the 12 months before the survey

†M > F (Based on t-test analysis, p < 0.05.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

## Percentage of High School Students Who Carried a Gun,\* 2017-2019†

\*Not counting the days when they carried a gun only for hunting or for a sport such as target shooting, on at least 1 day during the 12 months before the survey

†No change 2017-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ).]

This graph contains weighted results.

# Percentage of High School Students Who Did Not Go to School Because They Felt Unsafe at School or on Their Way to or from School,\* by Sex, Grade, and Race/Ethnicity, 2019

\*On at least 1 day during the 30 days before the survey  
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.  
This graph contains weighted results.

# Percentage of High School Students Who Did Not Go to School Because They Felt Unsafe at School or on Their Way to or from School,\* 1997-2019†

\*On at least 1 day during the 30 days before the survey

†Increased 1997-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1999, 2001, 2003, 2005, 2015.

This graph contains weighted results.

# Percentage of High School Students Who Were Threatened or Injured with a Weapon on School Property,\* by Sex, Grade,† and Race/Ethnicity, 2019

\*Such as a gun, knife, or club, one or more times during the 12 months before the survey

†9th > 10th, 12th > 10th (Based on t-test analysis, p < 0.05.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Were Threatened or Injured with a Weapon on School Property,\* 1997-2019†

\*Such as a gun, knife, or club, one or more times during the 12 months before the survey

†Increased 1997-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1999, 2001, 2003, 2005, 2015.

This graph contains weighted results.

# Percentage of High School Students Who Were in a Physical Fight,\* by Sex,† Grade,† and Race/Ethnicity,† 2019

\*One or more times during the 12 months before the survey

†M > F; 9th > 11th, 9th > 12th; B > H (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Were in a Physical Fight,\* 1997-2019†

\*One or more times during the 12 months before the survey

†Decreased 1997-2019, decreased 1997-2011, decreased 2011-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1999, 2001, 2003, 2005, 2015.

This graph contains weighted results.

## Percentage of High School Students Who Were in a Physical Fight on School Property,\* by Sex,† Grade, and Race/Ethnicity,† 2019

\*One or more times during the 12 months before the survey

†M > F; B > H, B > W (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Were in a Physical Fight on School Property,\* 1997-2019†

\*One or more times during the 12 months before the survey

†Decreased 1997-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1999, 2001, 2003, 2005, 2015.

This graph contains weighted results.

# Percentage of High School Students Who Experienced Sexual Dating Violence,\* by Sex,† Grade, and Race/Ethnicity,† 2019

\*Being forced by someone they were dating or going out with to do sexual things [counting such things as kissing, touching, or being physically forced to have sexual intercourse] that they did not want to, one or more times during the 12 months before the survey, among students who dated or went out with someone during the 12 months before the survey

†F > M; W > B (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Missing bar indicates fewer than 100 students in the subgroup.

This graph contains weighted results.

## Percentage of High School Students Who Experienced Physical Dating Violence,\* by Sex, Grade, and Race/Ethnicity, 2019

\*Being physically hurt on purpose by someone they were dating or going out with [counting such things as being hit, slammed into something, or injured with an object or weapon] one or more times during the 12 months before the survey, among students who dated or went out with someone during the 12 months before the survey

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Missing bar indicates fewer than 100 students in the subgroup.

This graph contains weighted results.

# Percentage of High School Students Who Were Bullied on School Property,\* by Sex, Grade,† and Race/Ethnicity,† 2019

\*Ever during the 12 months before the survey  
 †9th > 10th, 9th > 11th, 9th > 12th; H > B (Based on t-test analysis, p < 0.05.)  
 All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.  
 This graph contains weighted results.

# Percentage of High School Students Who Were Bullied on School Property,\* 2009-2019†

\*Ever during the 12 months before the survey

†Increased 2009-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 2015.

This graph contains weighted results.

## Percentage of High School Students Who Were Electronically Bullied,\* by Sex, Grade,† and Race/Ethnicity,† 2019

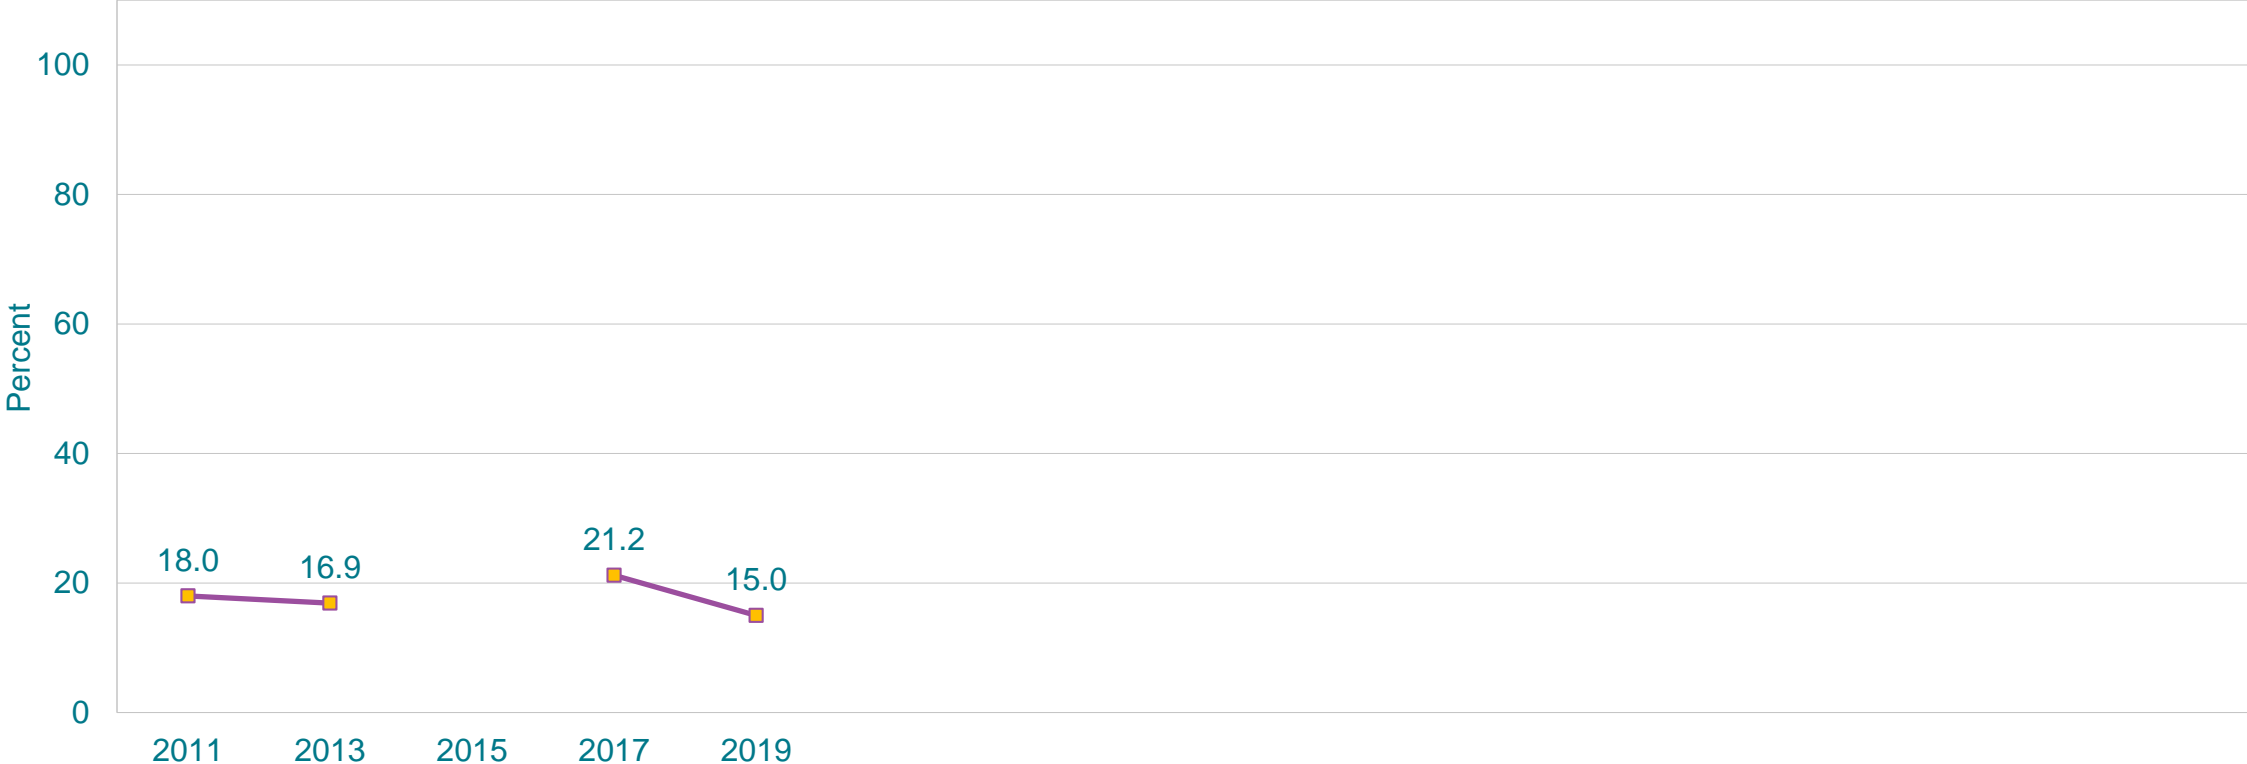

\*Counting being bullied through texting, Instagram, Facebook, or other social media, ever during the 12 months before the survey

†9th > 11th; H > B (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Were Electronically Bullied,\* 2011-2019†

\*Counting being bullied through texting, Instagram, Facebook, or other social media, ever during the 12 months before the survey

†No change 2011-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ).]

Data not available for 2015.

This graph contains weighted results.

## Percentage of High School Students Who Felt Sad or Hopeless,\* by Sex,† Grade,† and Race/Ethnicity,† 2019

\*Almost every day for  $\geq 2$  weeks in a row so that they stopped doing some usual activities, ever during the 12 months before the survey

†F > M; 9th > 12th, 10th > 12th; H > B (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Felt Sad or Hopeless,\* 2009-2019†

\*Almost every day for  $\geq 2$  weeks in a row so that they stopped doing some usual activities, ever during the 12 months before the survey

†Increased 2008-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 2015.

This graph contains weighted results.

# Percentage of High School Students Who Seriously Considered Attempting Suicide,\* by Sex,† Grade, and Race/Ethnicity, 2019

\*Ever during the 12 months before the survey  
 †F > M (Based on t-test analysis, p < 0.05.)  
 All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.  
 This graph contains weighted results.

# Percentage of High School Students Who Seriously Considered Attempting Suicide,\* 1997-2019†

\*Ever during the 12 months before the survey

†Decreased 1997-2019, decreased 1997-2009, no change 2009-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1999, 2001, 2003, 2005, 2015.

This graph contains weighted results.

# Percentage of High School Students Who Made a Plan About How They Would Attempt Suicide,\* by Sex,† Grade,† and Race/Ethnicity,† 2019

\*During the 12 months before the survey  
 †F > M; 9th > 11th; H > B, H > W (Based on t-test analysis, p < 0.05.)  
 All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.  
 This graph contains weighted results.

# Percentage of High School Students Who Made a Plan About How They Would Attempt Suicide,\* 1997-2019†

\*During the 12 months before the survey

†Decreased, 1997-2009, increased, 2009-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1999, 2001, 2003, 2005, 2015.

This graph contains weighted results.

# Percentage of High School Students Who Attempted Suicide,\* by Sex, Grade, and Race/Ethnicity,† 2019

\*One or more times during the 12 months before the survey

†B > W (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Attempted Suicide,\* 1997-2019†

\*One or more times during the 12 months before the survey

†Increased 1997-2019, no change 1997-2009, increased 2009-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1999, 2001, 2003, 2005, 2015.

This graph contains weighted results.

# Percentage of High School Students Who Had a Suicide Attempt That Resulted in an Injury, Poisoning, or Overdose That Had to Be Treated by a Doctor or Nurse,\* by Sex, Grade, and Race/Ethnicity, 2019

\*During the 12 months before the survey  
 All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.  
 This graph contains weighted results.

# Percentage of High School Students Who Had a Suicide Attempt That Resulted in an Injury, Poisoning, or Overdose That Had to Be Treated by a Doctor or Nurse,\* 1997-2019†

\*During the 12 months before the survey

†Increased 1997-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1999, 2001, 2003, 2005, 2015.

This graph contains weighted results.

# Percentage of High School Students Who Ever Tried Cigarette Smoking,\* by Sex,† Grade, and Race/Ethnicity,† 2019

\*Even one or two puffs

†M > F; W > B, W > H (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Ever Tried Cigarette Smoking,\* 1997-2019†

\*Even one or two puffs

†Decreased 1997-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1999, 2001, 2003, 2005, 2015.

This graph contains weighted results.

## Percentage of High School Students Who First Tried Cigarette Smoking Before Age 13 Years,\* by Sex,† Grade, and Race/Ethnicity, 2019

\*Even one or two puffs

†M > F (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who First Tried Cigarette Smoking Before Age 13 Years,\* 2017-2019†

\*Even one or two puffs

†No change 2017-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ).]

This graph contains weighted results.

# Percentage of High School Students Who Currently Smoked Cigarettes,\* by Sex,† Grade, and Race/Ethnicity,† 2019

\*On at least 1 day during the 30 days before the survey

†M > F; W > B, W > H (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Currently Smoked Cigarettes,\* 1997-2019†

\*On at least 1 day during the 30 days before the survey

†Decreased 1997-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1999, 2001, 2003, 2005, 2015.

This graph contains weighted results.

## Percentage of High School Students Who Currently Smoked Cigarettes Frequently,\* by Sex, Grade,† and Race/Ethnicity,† 2019

\*On 20 or more days during the 30 days before the survey

†12th > 10th, 12th > 11th; W > B (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Currently Smoked Cigarettes Frequently,\* 1997-2019†

\*On 20 or more days during the 30 days before the survey

†Decreased 1997-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1999, 2001, 2003, 2005, 2015.

This graph contains weighted results.

## Percentage of High School Students Who Currently Smoked Cigarettes Daily,\* by Sex, Grade, and Race/Ethnicity,† 2019

\*On all 30 days during the 30 days before the survey

†W > B (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Currently Smoked Cigarettes Daily,\* 1997-2019†

\*On all 30 days during the 30 days before the survey

†Decreased 1997-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1999, 2001, 2003, 2005, 2015.

This graph contains weighted results.

# Percentage of High School Students Who Smoked More Than 10 Cigarettes Per Day,\* by Sex, Grade, and Race/Ethnicity, 2019

\*On the days they smoked during the 30 days before the survey, among students who currently smoked cigarettes  
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.  
Missing bar indicates fewer than 100 students in the subgroup.  
This graph contains weighted results.

# Percentage of High School Students Who Ever Used an Electronic Vapor Product,\* by Sex, Grade, and Race/Ethnicity,† 2019

\*Including e-cigarettes, e-cigars, e-pipes, vape pipes, vaping pens, e-hookahs, and hookah pens [such as blu, NJOY, Vuse, MarkTen, Logic, Vapin Plus, eGo, and Halo]

†H > B, W > B, W > H (Based on t-test analysis, p < 0.05.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Ever Used an Electronic Vapor Product,\* 2017-2019†

\*Including e-cigarettes, e-cigars, e-pipes, vape pipes, vaping pens, e-hookahs, and hookah pens [such as blu, NJOY, Vuse, MarkTen, Logic, Vapin Plus, eGo, and Halo]

†Increased 2017-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ).]

This graph contains weighted results.

# Percentage of High School Students Who Currently Used Electronic Vapor Products Daily,\* by Sex, Grade, and Race/Ethnicity,† 2019

\*On all 30 days during the 30 days before the survey

†W > B, W > H (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Currently Used Electronic Vapor Products Daily,\* 2017-2019†

\*On all 30 days during the 30 days before the survey

†Increased 2017-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ).]

This graph contains weighted results.

# Percentage of High School Students Who Usually Got Their Own Electronic Vapor Products by Buying Them in a Store,\* by Sex, Grade, and Race/Ethnicity, 2019

\*Such as a convenience store, supermarket, discount store, gas station, or vape store, during the 30 days before the survey, among students who currently used electronic vapor products and who were aged <18 years

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Missing bar indicates fewer than 100 students in the subgroup.

This graph contains weighted results.

# Percentage of High School Students Who Usually Got Their Own Electronic Vapor Products by Buying Them in a Store,\* 2017-2019†

\*Such as a convenience store, supermarket, discount store, gas station, or vape store, during the 30 days before the survey, among students who currently used electronic vapor products and who were aged <18 years

†No change 2017-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ).]

This graph contains weighted results.

## Percentage of High School Students Who Currently Used Smokeless Tobacco,\* by Sex,<sup>†</sup> Grade, and Race/Ethnicity, 2019

\*Chewing tobacco, snuff, dip, snus, or dissolvable tobacco products [such as Copenhagen, Grizzly, Skoal, or Camel Snus], not counting any electronic vapor products, on at least 1 day during the 30 days before the survey

<sup>†</sup>M > F (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Currently Used Smokeless Tobacco,\* 2017-2019†

\*Chewing tobacco, snuff, dip, snus, or dissolvable tobacco products [such as Copenhagen, Grizzly, Skoal, or Camel Snus], not counting any electronic vapor products, on at least 1 day during the 30 days before the survey

†Decreased 2017-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ).]

This graph contains weighted results.

## Percentage of High School Students Who Currently Smoked Cigars,\* by Sex,† Grade, and Race/Ethnicity,† 2019

\*Cigars, cigarillos, or little cigars, on at least 1 day during the 30 days before the survey

†M > F; W > B, W > H (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Currently Smoked Cigars,\* 2009-2019†

\*Cigars, cigarillos, or little cigars, on at least 1 day during the 30 days before the survey

†Decreased 2008-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 2015.

This graph contains weighted results.

# Percentage of High School Students Who Currently Smoked Cigarettes or Cigars,\* by Sex,† Grade,† and Race/Ethnicity,† 2019

\*On at least 1 day during the 30 days before the survey

†M > F; 11th > 10th; W > B, W > H (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Currently Smoked Cigarettes or Cigars,\* 2009-2019†

\*On at least 1 day during the 30 days before the survey

†Decreased 2008-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 2015.

This graph contains weighted results.

## Percentage of High School Students Who Currently Smoked Cigarettes or Cigars or Used Smokeless Tobacco,\* by Sex,† Grade, and Race/Ethnicity,† 2019

\*On at least 1 day during the 30 days before the survey

†M > F; W > B, W > H (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Currently Smoked Cigarettes or Cigars or Used Smokeless Tobacco or Electronic Vapor Products,\* by Sex,† Grade,† and Race/Ethnicity,† 2019

\*On at least 1 day during the 30 days before the survey

†M > F; 9th > 10th, 11th > 10th; W > B, W > H (Based on t-test analysis, p < 0.05.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Currently Smoked Cigarettes or Used Electronic Vapor Products,\* by Sex,† Grade,† and Race/Ethnicity,† 2019

\*On at least 1 day during the 30 days before the survey

†M > F; 9th > 10th, 11th > 10th, 12th > 10th; W > B, W > H (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Currently Smoked Cigarettes or Used Electronic Vapor Products,\* 2017-2019†

\*On at least 1 day during the 30 days before the survey

†Increased 2017-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ).]

This graph contains weighted results.

# Percentage of High School Students Who Tried to Quit Using All Tobacco Products,\* by Sex, Grade, and Race/Ethnicity, 2019

\*Including cigarettes, cigars, smokeless tobacco, shisha or hookah tobacco, and electronic vapor products, ever during the 12 months before the survey, among students who used any tobacco products during the 12 months before the survey

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Missing bar indicates fewer than 100 students in the subgroup.

This graph contains weighted results.

# Percentage of High School Students Who Tried to Quit Using All Tobacco Products,\* 2017-2019†

\*Including cigarettes, cigars, smokeless tobacco, shisha or hookah tobacco, and electronic vapor products, ever during the 12 months before the survey, among students who used any tobacco products during the 12 months before the survey

†No change 2017-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ).]

This graph contains weighted results.

## Percentage of High School Students Who Had Their First Drink of Alcohol Before Age 13 Years,\* by Sex,† Grade, and Race/Ethnicity, 2019

\*Other than a few sips

†M > F (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Had Their First Drink of Alcohol Before Age 13 Years,\* 1997-2019†

\*Other than a few sips

†Decreased 1997-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1999, 2001, 2003, 2005, 2015.

This graph contains weighted results.

# Percentage of High School Students Who Currently Drank Alcohol,\* by Sex, Grade,† and Race/Ethnicity,† 2019

\*At least one drink of alcohol, on at least 1 day during the 30 days before the survey  
 †11th > 10th, 12th > 9th, 12th > 10th; W > B, W > H (Based on t-test analysis, p < 0.05.)  
 All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.  
 This graph contains weighted results.

# Percentage of High School Students Who Currently Drank Alcohol,\* 1997-2019†

\*At least one drink of alcohol, on at least 1 day during the 30 days before the survey

†Decreased 1997-2019, decreased 1997-2011, decreased 2011-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1999, 2001, 2003, 2005, 2015.

This graph contains weighted results.

## Percentage of High School Students Who Currently Were Binge Drinking,\* by Sex, Grade,† and Race/Ethnicity,† 2019

\*Had four or more drinks of alcohol in a row for female students or five or more drinks of alcohol in a row for male students, within a couple of hours, on at least 1 day during the 30 days before the survey

†11th > 10th, 12th > 10th; W > B, W > H (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Currently Were Binge Drinking,\* 2017-2019†

\*Had four or more drinks of alcohol in a row for female students or five or more drinks of alcohol in a row for male students, within a couple of hours, on at least 1 day during the 30 days before the survey

†No change 2017-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ).]

This graph contains weighted results.

# Percentage of High School Students Who Reported That the Largest Number of Drinks They Had in a Row Was 10 or More,\* by Sex, Grade,† and Race/Ethnicity,† 2019

\*Within a couple of hours, during the 30 days before the survey

†12th > 9th, 12th > 10th, 12th > 11th; W > B, W > H (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Usually Got the Alcohol They Drank by Someone Giving It to Them,\* by Sex, Grade, and Race/Ethnicity, 2019

\*During the 30 days before the survey, among students who currently drank alcohol  
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.  
Missing bar indicates fewer than 100 students in the subgroup.  
This graph contains weighted results.

# Percentage of High School Students Who Usually Got the Alcohol They Drank by Someone Giving It to Them,\* 2009-2019†

\*During the 30 days before the survey, among students who currently drank alcohol

†No change 2009-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 2015.

This graph contains weighted results.

# Percentage of High School Students Who Ever Used Marijuana,\* by Sex, Grade,† and Race/Ethnicity,† 2019

\*One or more times during their life

†11th > 9th, 11th > 10th, 12th > 9th, 12th > 10th; B > H (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Ever Used Marijuana,\* 1997-2019†

\*One or more times during their life

†Decreased 1997-2019, decreased 1997-2009, no change 2009-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1999, 2001, 2003, 2005, 2015.

This graph contains weighted results.

# Percentage of High School Students Who Tried Marijuana for the First Time Before Age 13 Years, by Sex,\* Grade,\* and Race/Ethnicity, 2019

\*M > F; 9th > 10th (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

†No change 2017-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ).]

This graph contains weighted results.

# Percentage of High School Students Who Ate Fruit or Drank 100% Fruit Juices One or More Times Per Day,\* by Sex, Grade, and Race/Ethnicity, 2019

\*Such as orange juice, apple juice, or grape juice, during the 7 days before the survey  
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.  
This graph contains weighted results.

# Percentage of High School Students Who Ate Fruit or Drank 100% Fruit Juices One or More Times Per Day,\* 2017-2019†

\*Such as orange juice, apple juice, or grape juice, during the 7 days before the survey

†No change 2017-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade (p < 0.05).]

This graph contains weighted results.

## Percentage of High School Students Who Ate Fruit or Drank 100% Fruit Juices Two or More Times Per Day,\* by Sex,<sup>†</sup> Grade, and Race/Ethnicity, 2019

\*Such as orange juice, apple juice, or grape juice, during the 7 days before the survey

<sup>†</sup>M > F (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Ate Fruit or Drank 100% Fruit Juices Two or More Times Per Day,\* 2017-2019†

\*Such as orange juice, apple juice, or grape juice, during the 7 days before the survey

†No change 2017-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ).]

This graph contains weighted results.

## Percentage of High School Students Who Did Not Eat Green Salad,\* by Sex, Grade, and Race/Ethnicity,† 2019

\*One or more times during the 7 days before the survey

†B > H, B > W (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Did Not Eat Green Salad,\* 2017-2019†

\*One or more times during the 7 days before the survey

†No change 2017-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ).]

This graph contains weighted results.

# Percentage of High School Students Who Did Not Eat Potatoes,\* by Sex, Grade, and Race/Ethnicity,† 2019

\*One or more times during the 7 days before the survey

†B > W, H > W (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Did Not Eat Potatoes,\* 2017-2019†

\*One or more times during the 7 days before the survey

†No change 2017-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade (p < 0.05).]

This graph contains weighted results.

## Percentage of High School Students Who Did Not Eat Carrots,\* by Sex, Grade, and Race/Ethnicity,† 2019

\*One or more times during the 7 days before the survey

†B > H, B > W (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Did Not Eat Carrots,\* 2017-2019†

\*One or more times during the 7 days before the survey

†No change 2017-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ).]

This graph contains weighted results.

# Percentage of High School Students Who Did Not Eat Other Vegetables,\* by Sex, Grade, and Race/Ethnicity,† 2019

\*One or more times during the 7 days before the survey

†B > H, B > W (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Did Not Eat Other Vegetables,\* 2017-2019†

\*One or more times during the 7 days before the survey

†No change 2017-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ).]

This graph contains weighted results.

## Percentage of High School Students Who Did Not Eat Vegetables,\* by Sex, Grade, and Race/Ethnicity,† 2019

\*Green salad, potatoes [excluding French fries, fried potatoes, or potato chips], carrots, or other vegetables, during the 7 days before the survey

†B > H, B > W (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Did Not Eat Vegetables,\* 2017-2019†

\*Green salad, potatoes [excluding French fries, fried potatoes, or potato chips], carrots, or other vegetables, during the 7 days before the survey  
†No change 2017-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ).]

\*Green salad, potatoes [excluding French fries, fried potatoes, or potato chips], carrots, or other vegetables, during the 7 days before the survey

<sup>†</sup>M > F (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Ate Vegetables Two or More Times Per Day,\* 2017-2019†

\*Green salad, potatoes [excluding French fries, fried potatoes, or potato chips], carrots, or other vegetables, during the 7 days before the survey

†Decreased 2017-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ).]

This graph contains weighted results.

# Percentage of High School Students Who Ate Vegetables Three or More Times Per Day,\* by Sex, Grade, and Race/Ethnicity, 2019

\*Green salad, potatoes [excluding French fries, fried potatoes, or potato chips], carrots, or other vegetables, during the 7 days before the survey  
 All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.  
 This graph contains weighted results.

# Percentage of High School Students Who Ate Vegetables Three or More Times Per Day,\* 2017-2019†

\*Green salad, potatoes [excluding French fries, fried potatoes, or potato chips], carrots, or other vegetables, during the 7 days before the survey

†No change 2017-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ).]

This graph contains weighted results.

# Percentage of High School Students Who Did Not Drink a Can, Bottle, or Glass of Soda or Pop,\* by Sex, Grade, and Race/Ethnicity, 2019

\*Such as Coke, Pepsi, or Sprite, not counting diet soda or diet pop, during the 7 days before the survey  
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.  
This graph contains weighted results.

# Percentage of High School Students Who Did Not Drink a Can, Bottle, or Glass of Soda or Pop,\* 2017-2019†

\*Such as Coke, Pepsi, or Sprite, not counting diet soda or diet pop, during the 7 days before the survey

†No change 2017-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade (p < 0.05).]

This graph contains weighted results.

# Percentage of High School Students Who Drank a Can, Bottle, or Glass of Soda or Pop One or More Times Per Day,\* by Sex, Grade, and Race/Ethnicity, 2019

\*Such as Coke, Pepsi, or Sprite, not counting diet soda or diet pop, during the 7 days before the survey  
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.  
This graph contains weighted results.

# Percentage of High School Students Who Drank a Can, Bottle, or Glass of Soda or Pop One or More Times Per Day,\* 2017-2019†

\*Such as Coke, Pepsi, or Sprite, not counting diet soda or diet pop, during the 7 days before the survey

†Decreased 2017-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade (p < 0.05).]

This graph contains weighted results.

# Percentage of High School Students Who Drank a Can, Bottle, or Glass of Soda or Pop Two or More Times Per Day,\* by Sex, Grade, and Race/Ethnicity, 2019

\*Such as Coke, Pepsi, or Sprite, not counting diet soda or diet pop, during the 7 days before the survey  
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.  
This graph contains weighted results.

# Percentage of High School Students Who Drank a Can, Bottle, or Glass of Soda or Pop Two or More Times Per Day,\* 2017-2019†

\*Such as Coke, Pepsi, or Sprite, not counting diet soda or diet pop, during the 7 days before the survey

†Decreased 2017-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ).]

This graph contains weighted results.

# Percentage of High School Students Who Did Not Drink Milk,\* by Sex,† Grade,† and Race/Ethnicity,† 2019

\*During the 7 days before the survey

†F > M; 11th > 9th, 12th > 9th; B > W (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

## Percentage of High School Students Who Did Not Drink Milk,\* 2017-2019†

\*During the 7 days before the survey

†No change 2017-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ).]

This graph contains weighted results.

## Percentage of High School Students Who Drank One or More Glasses Per Day of Milk,\* by Sex,<sup>†</sup> Grade,<sup>†</sup> and Race/Ethnicity, 2019

\*Counting the milk they drank in a glass or cup, from a carton, or with cereal and counting the half pint of milk served at school as equal to one glass, during the 7 days before the survey

<sup>†</sup>M > F; 9th > 12th, 10th > 12th (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Drank One or More Glasses Per Day of Milk,\* 2017-2019†

\*Counting the milk they drank in a glass or cup, from a carton, or with cereal and counting the half pint of milk served at school as equal to one glass, during the 7 days before the survey

†Decreased 2017-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ).]

This graph contains weighted results.

## Percentage of High School Students Who Drank Three or More Glasses Per Day of Milk,\* by Sex,<sup>†</sup> Grade,<sup>†</sup> and Race/Ethnicity, 2019

\*Counting the milk they drank in a glass or cup, from a carton, or with cereal and counting the half pint of milk served at school as equal to one glass, during the 7 days before the survey

<sup>†</sup>M > F; 9th > 12th (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Drank Three or More Glasses Per Day of Milk,\* 2017-2019†

\*Counting the milk they drank in a glass or cup, from a carton, or with cereal and counting the half pint of milk served at school as equal to one glass, during the 7 days before the survey

†No change 2017-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ).]

This graph contains weighted results.

# Percentage of High School Students Who Did Not Eat Breakfast,\* by Sex, Grade, and Race/Ethnicity, 2019

\*During the 7 days before the survey  
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.  
This graph contains weighted results.

# Percentage of High School Students Who Did Not Eat Breakfast,\* 2017-2019†

\*During the 7 days before the survey

†No change 2017-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ).]

This graph contains weighted results.

# Percentage of High School Students Who Ate Breakfast on All 7 Days,\* by Sex, Grade, and Race/Ethnicity, 2019

\*During the 7 days before the survey  
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.  
This graph contains weighted results.

# Percentage of High School Students Who Ate Breakfast on All 7 Days,\* 2017-2019†

\*During the 7 days before the survey

†No change 2017-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ).]

This graph contains weighted results.

# Percentage of High School Students Who Were Physically Active at Least 60 Minutes Per Day on 5 or More Days,\* by Sex,<sup>†</sup> Grade, and Race/Ethnicity, 2019

\*In any kind of physical activity that increased their heart rate and made them breathe hard some of the time during the 7 days before the survey

<sup>†</sup>M > F (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Were Physically Active at Least 60 Minutes Per Day on 5 or More Days,\* 2017-2019†

\*In any kind of physical activity that increased their heart rate and made them breathe hard some of the time during the 7 days before the survey  
†No change 2017-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ).]

# Percentage of High School Students Who Were Ever Tested for Human Immunodeficiency Virus (HIV),\* 2013-2019†

\*Not counting tests done if they donated blood

†No change 2013-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ).]

Data not available for 2015.

This graph contains weighted results.

# Percentage of High School Students Who Were Ever Tested for a Sexually Transmitted Disease (STD),\* by Sex, Grade,† and Race/Ethnicity, 2019

\*During the 12 months before the survey

†12th > 9th (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Saw a Dentist,\* by Sex, Grade, and Race/Ethnicity, 2019

\*For a check-up, exam, teeth cleaning, or other dental work, during the 12 months before the survey  
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.  
This graph contains weighted results.

## Percentage of High School Students Who Saw a Dentist,\* 2017-2019†

\*For a check-up, exam, teeth cleaning, or other dental work, during the 12 months before the survey

†No change 2017-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ).]

This graph contains weighted results.

# Percentage of High School Students Who Never Saw a Dentist,\* by Sex, Grade,† and Race/Ethnicity, 2019

\*For a check-up, exam, teeth cleaning, or other dental work  
 †12th > 11th (Based on t-test analysis, p < 0.05.)  
 All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.  
 This graph contains weighted results.

# Percentage of High School Students Who Never Saw a Dentist,\* 2017-2019†

\*For a check-up, exam, teeth cleaning, or other dental work

†No change 2017-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ).]

# Percentage of High School Students Who Had Ever Been Told by a Doctor or Nurse That They Had Asthma, by Sex, Grade, and Race/Ethnicity,\* 2019

\*B > H, B > W (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Had Ever Been Told by a Doctor or Nurse That They Had Asthma, 2009-2019\*

\*No change 2009-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]  
Data not available for 2015.

# Percentage of High School Students Who Got 8 or More Hours of Sleep,\* by Sex, Grade, and Race/Ethnicity, 2019

\*On an average school night  
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.  
This graph contains weighted results.

# Percentage of High School Students Who Got 8 or More Hours of Sleep,\* 2017-2019†

\*On an average school night

†No change 2017-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ).]

# Percentage of High School Students Who Described Their Grades in School As Mostly A's or B's,\* by Sex, Grade,† and Race/Ethnicity,† 2019

\*During the 12 months before the survey

†12th > 9th; W > B (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Described Their Grades in School As Mostly A's or B's,\* 2017-2019†

\*During the 12 months before the survey

†No change 2017-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ).]

# Percentage of High School Students Who Drank a Can, Bottle, or Glass of a Sugar-Sweetened Beverage,\* by Sex, Grade, and Race/Ethnicity,† 2019

\*Such as sports drinks (for example, Gatorade or PowerAde), energy drinks (for example, Red Bull or Jolt), lemonade, sweetened tea or coffee drinks, flavored milk, Snapple, or Sunny Delight, not counting soda or pop or 100% fruit juice, one or more times per day during the 7 days before the survey

†W > B, W > H (Based on t-test analysis, p < 0.05.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Reported That Some of Their Classroom Teachers Provide Short Physical Activity Breaks During Regular Class Time,\* by Sex, Grade,† and Race/Ethnicity,† 2019

\*Not counting their physical education teacher

†10th > 11th, 10th > 12th; B > W (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Had Been Told by a Doctor or Nurse That They Had Asthma and Who Still Have Asthma, by Sex, Grade, and Race/Ethnicity, 2019

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.  
This graph contains weighted results.

# Percentage of High School Students Who Had Been Told by a Doctor or Nurse That They Had Asthma and Who Still Have Asthma, 2009-2019\*

\*No change 2009-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]  
Data not available for 2015.

# Percentage of High School Students Who Have Ever Been Told by a Doctor or Nurse That They Had High Blood Pressure, by Sex,\* Grade, and Race/Ethnicity, 2019

\*M > F (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Reported Their Doctor or Nurse Discussed How to Maintain a Healthy Weight,\* by Sex, Grade,† and Race/Ethnicity,† 2019

\*During their last check-up, among students who have had a check-up

†10th > 12th; B > W (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Described Their Health in General As Excellent or Very Good, by Sex,\* Grade, and Race/Ethnicity, 2019

\*M > F (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Have Physical Disabilities or Long-Term Health Problems,\* by Sex, Grade, and Race/Ethnicity, 2019

\*Meaning 6 months or more

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Have Long-Term Emotional Problems or Learning Disabilities,\* by Sex, Grade, and Race/Ethnicity, 2019

\*Meaning 6 months or more

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Have to Avoid Some Foods Because Eating the Food Could Cause an Allergic Reaction,\* by Sex, Grade, and Race/Ethnicity, 2019

\*Such as skin rashes, swelling, itching, vomiting, coughing, or trouble breathing  
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.  
This graph contains weighted results.

# Percentage of High School Students Who Reported a Doctor or Nurse Told Them or Their Family That They Have to Avoid Some Foods Because They Have a Food Allergy, by Sex, Grade, and Race/Ethnicity, 2019

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.  
This graph contains weighted results.

## Percentage of High School Students Who Have Ever Been Told by a Doctor or Nurse That They Had Epilepsy or a Seizure Disorder, by Sex, Grade, and Race/Ethnicity,\* 2019

\*B > H, W > H (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Still Have a Seizure Disorder,\* by Sex, Grade, and Race/Ethnicity, 2019

\*Among students who have ever had a seizure disorder  
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.  
Missing bar indicates fewer than 100 students in the subgroup.  
This graph contains weighted results.

# Percentage of High School Students Who Did Not Usually Sleep in Their Parent's or Guardian's Home,\* by Sex,† Grade, and Race/Ethnicity, 2019

\*During the 30 days before the survey

†M > F (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

## Percentage of High School Students Who Have Ever Slept Away from Their Parents or Guardians Because They Were Kicked Out, Ran Away, or Were Abandoned,\* by Sex,<sup>†</sup> Grade, and Race/Ethnicity, 2019

\*During the 30 days before the survey

<sup>†</sup>M > F (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

## Percentage of High School Students Who Most of the Time or Always Feel Safe and Secure at School, by Sex,\* Grade,\* and Race/Ethnicity, 2019

\*F > M; 11th > 10th (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Most of the Time or Always Feel Safe and Secure at School, 2017-2019\*

\*No change 2017-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ).]

## Percentage of High School Students Who Reported There Is at Least One Teacher or Other Adult in Their School That They Can Talk to If They Have a Problem, by Sex, Grade, and Race/Ethnicity,\* 2019

\*W > B, W > H (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.

# Percentage of High School Students Who Reported There Is at Least One Teacher or Other Adult in Their School That They Can Talk to If They Have a Problem, 2009-2019\*

\*No change 2009-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p < 0.05$ ). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]  
Data not available for 2015.

# Percentage of High School Students Who Probably or Definitely Will Complete a Post High School Program,\* by Sex,† Grade, and Race/Ethnicity, 2019

\*Such as a vocational training program, military service, community college, or 4-year college

†F > M (Based on t-test analysis,  $p < 0.05$ .)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.
