

Dental ECHO

Well-Ahead Louisiana offers Dental ECHO as an innovative healthcare delivery solution designed to increase access to oral health specialists in areas facing dental workforce shortages. This monthly virtual learning series aims to share knowledge and expand treatment capacity in rural communities. It provides ongoing learning and support for clinicians, empowering them to offer equitable dental health care to their patients. As a result, it reduces the need for patients to travel outside of their communities to receive dental care. The Dental ECHO project helps providers acquire new skills and competencies, establish best practices in oral health through case-based learning, and foster shared knowledge networks. Well-Ahead Louisiana collaborates with a diverse group of professionals and students to engage in this “all-teach, all-learn” environment.

ELIGIBLE PARTICIPANTS

- Advanced practitioners
- CHWs
- Dentists and dental hygienists
- Educators
- Students
